The Chain of Trails study area focuses on the Mt. Baker foothills region, loosely defined as Glenhaven to Glacier; Sumas to Wickersham. This map was developed with the help of the members of the Mt. Baker Foothills Steering Committee to identify sites where residents and visitors often go. Representative commercial centers, schools, recreation areas and other attractions are represented by the dots on the map. As part of a public survey, respondents are invited to add sites or trails that they’d like to see included in the Chain of Trails plan.

To see the initial results of the survey responses, check the "Survey Results" map elsewhere on this website.
